

SHUBHANKAR JAIN

shubhijain@caltech.edu

1200 E. California Blvd, Pasadena, 91126

4084299472

PROFILE

Entrepreneur with focus in mobile and web application development. Leads startups and manages large teams. Develops and executes creative solutions for both businesses and the community. Enjoys working with enthusiastic team members. Loves to participate in hackathons around the nation. Is passionate about learning new technologies. Co-Author of Holding Hope, a book about the compassion the community must spread to those with disabilities. Founded the largest hackathon on the west coast, hackTECH 2014.

EDUCATION

California Institute of Technology

Computer Science Fall 2013 – Spring 2017

Cupertino High School

H.S. Diploma Fall 2009 – Spring 2013

EXPERIENCE

hackTECH (the largest hackathon on the West Coast)

Founder September 2013 - Present

On January 24, 2014, 1200 hackers from all over the nation came to compete in hackTECH. As founder, my team and I raised 250k in sponsorship money, managed 35+ sponsors, and handled event logistics to make hackTECH 2014 the largest hackathon on the West Coast. Some sponsors include Microsoft, Amazon, Ebay, Pebble, Sendgrid, Twilio, and etc. (www.hacktech.io)

JPL

Data Scientist March 2014 – June 2014

Will be conducting a variety of data mining, data visualization, and data analytics projects with Deep Space telemetry information from NASA as well as for internal purposes in JPL using D3, ArborJS, iPython, AWS, and a variety of other tools.

WorldWeDream (WWD)

Founder and President August 2011 – December 2013

WorldWeDream is a non-profit organization whose mission is to change the world through inspiration and compassion. WWD believes that everyone, including people with capability challenges, should be given a fair chance to contribute in the community to the best of their potential. I created a social media platform for readers to share and read inspirational stories. (www.worldwedream.org)

Audeo

Founder and Developer July 2013 – December 2013

Created a mobile application that uses NLP and Sentiment Analysis to turn real-time conversation into concepts with visual representation for a tool to aid in autism management. Worked with a few venture capitalists to get the app to market but was unsuccessful. Won 2nd place at AutismHack13.

Rocketweb

Founder and CEO July 2009 – January 2011

Rocketweb was a business which created comprehensive online marketing solutions for small businesses in the Bay Area. I created websites that could be managed by non-technical owners, built a social presence on Facebook and Yelp, and produced customer video testimonials, marketing brochures, and other marketing tools for several local businesses.
